A THING OR TWO ABOUT GETTING ORGANIZED

Some say a messy workspace is the sign of a creative mind. Others say clutter slows them down. Either way, you have to be organized to know where you are and where you're heading. So, how about a couple ideas for organization?

-Clearing out the stacks of paper. Going digital can help you with storage of documents. Whether you prefer disc, drives, tape or cloud store your data whenever you can. You may use multiple storage options to get the job done. Check out our catalog or on line for a variety of storage options.

-Old school storage boxes. We will never be totally paperless, so hard copies, folders and those discs need to be stored – the stuff you don't use regularly or you have to hold onto. Sturdy, stackable storage boxes are the perfect answer. Check out our catalog or on line for a great selection and at a competitive price.

-Labeling for easy recognition. Want a label that easy to read and can be color coded, than try a labeler. You'll wonder why you didn't get one years ago. Well-marked shelves, boxes, files, etc., make for easy organization and quick access. And, guess what – we have them listed in our catalog and on-line. Or, give us a call to help you decide which would be best for your application.

These are just a few of the suggestions we have for getting organized for the New Year. Find a place for everything and remember to put it there.
